

CELLTRION, INC.
THIRD-QUARTER 2022
EARNINGS RELEASE

November 9, 2022

Disclaimer

The financial information contained in this document is consolidated earnings results based on K-IFRS.

This document is provided for the convenience of investors only before the external audit is completed.

The audit outcomes may cause some changes in this document.

This document contains ‘forward-looking statements’ related to the business performance, market condition, future events and plan. Therefore, the recipients of this document shall be aware that the forward-looking statements set forth herein may not correspond to the actual business performance of the company due to changes in the business/industry environment and the long-term business plan of the company.

The purpose of this document is not to recommend investment in the company. The company hereby expressly disclaims any and all liability resulting from investors’ reliance on the information contained herein.

AGENDA

01 3Q22 Financial Results

02 Business Update

03 R&D Update

01 3Q22 Financial Results

9-Month 2022 Sales Hit 1.8 Trillion won with >30% OPM

driven by Balanced Growth across Biosimilar and Small Molecule Business Units

(Unit : KRW Billion)

	3Q22	2Q22	QoQ	3Q21	YoY
Sales	645.6	596.2	+8.3%	401.9	+60.6%
Operating Profit	213.8	203.5	+5.1%	166.9	+28.1%
OP Margin	33.1%	34.1%	-1.0%p	41.5%	-8.4%p

* 3Q21 and 2Q22 sales are based on revised financial statements that reflect the impact of discontinued operations following the sale of CT USA

■ Sales increased +60.6% YoY

- ✓ Biosimilar sales increased above 30% YoY, led by strong growth of Remsima® IV and Herzuma®
- ✓ Small molecule business sales grew above 50% YoY, driven primarily by TAKEDA Primary Care assets
- ✓ Nonrecurring increase in sales due to the realized revenue from the sale of Celltrion USA

■ Operating profit increased +28.1% YoY, with OP margin remaining solid at > 30%

- ✓ Changes in YoY sales mix, mainly lower sales proportion of higher-margin Truxima®, resulted in a decrease in GP margin
- ✓ OP margin still recorded > 30%, driven by reduced COGS due to productivity improvement, efficient execution of SG&A, and sales growth

Product Sales Mix Consolidated

Biosimilar and Chemical Business Delivered Strong Performance

(Unit : KRW Billion)

1. Sales mix percentage of each product is based on sales before the price adjustment

2. 'Others' comprise F&F service, price adjustment, realized revenue (3Q22) from the sale of Celltrion USA, etc

3. 3Q21 - 2Q22 sales are based on revised financial statements that reflect the impact of discontinued operations following the sale of CT USA

Balance Sheet Consolidated

Financial Stability Maintained

- Net Cash 482.9Bn KRW as of Dec. 2021 → Net Debt 171.2Bn won as of Sep. 2022*
- Debt-Equity ratio 40.1% as of Dec. 2021 → 39.2% as of Sep. 2022

Statement of Financial Position Summary

(Unit : KRW Billion)

	Sep. 2022	Dec. 2021
Total Assets	5,901.3	5,674.1
• Current Assets	3,142.5	3,074.5
- Cashable Assets ¹	633.7	1,219.9
• Non-Current Assets	2,758.8	2,599.7
Total Liabilities	1,661.6	1,623.7
• Current Liabilities	1,193.9	1,210.5
• Non-Current Liabilities	467.6	413.3
※ Borrowings (Long & Short Term)	804.9	737.0
Shareholder's Equity	4,239.8	4,050.4
- Capital Stock	140.8	137.9
- Retained Earnings	3,415.9	3,052.5

* Cashable assets decreased due to treasury stock purchases and cash dividends to increase shareholder value

Net Debt and Debt-Equity Ratio

■ Net Debt² ○ Debt-Equity Ratio³ (Unit : KRW Billion, %)

1. Cashable Assets = Cash & Cash Equivalent, and Short-term financial instrument

2. Net-debt = Borrowings(long & short term) - Cashable Assets

3. Debt to Equity Ratio = Total Liabilities / Shareholder's Equity

Earnings Summary 3Q22 _ Consolidated

(Unit: KRW Million)

	Quarterly				
	3Q22	2Q22	3Q21	QoQ	YoY
Sales	645,637	596,230	401,919	8.3%	60.6%
COGS	345,641	295,852	152,340	16.8%	126.9%
Gross Profit	299,996	300,378	249,579	-0.1%	20.2%
(GP Margin)	46.5%	50.4%	62.1%	-3.9%p	-15.6%p

Financial Income/Loss	3,561	5,599	21,297	-	-
Profit before Income Tax	207,445	203,929	180,937	1.7%	14.7%
Net Profit	157,013	163,231	137,021	-3.8%	14.6%
(NP Margin)	34.7%	32.8%	41.2%	1.9%p	-6.5%p

02 Business Update

EU Market Share 2Q22

Source: IQVIA, Celltrion Healthcare

EU 5 Market Share (Volume)

- Remsima® SC delivered rapid volume growth in the infliximab market
- Remsima® IV remains the most prescribed infliximab in the EU(> 50%) while SC is growing rapidly
- 2Q22 Remsima® SC market share: Germany 27%, France 16%

EU Sales Trend (Volume)

- Remsima® SC delivered 53% QoQ growth
- The fastest growing drug, compared to the recently launched blockbuster new drugs (sales volume basis)

US Market Share 3Q22

Source: Symphony Health, Shinhan Investment

03 R&D Update

Biosimilars R&D Update

	Portfolio/Pipeline	Reference Product	R&D Status		3Q22 Key Updates
			US	EU	
Autoimmune Diseases	 Remsima Infliximab	REMICADE® Infliximab	Approved	Approved	✓ Competitiveness of Remsima SC® and Yuflyma introduced at UEGW ▪ Data showed that serum levels stayed stable in patients switched from IV IFX¹ to Remsima® SC ▪ Yuflyma® is available in the same strengths/presentations as the originator
	Remsima® SC	-	In Phase 3	Approved	
	 Yuflyma adalimumab	HUMIRA® Adalimumab	Submitted BLA (Nov. 2020)	Approved	
	CT-P43	STELARA® Ustekinumab	In Phase 3		
	CT-P47	ACTEMRA® Tocilizumab	In Phase 3		
Oncology	 Truxima Rituximab	RITUXAN® Rituximab	Approved	Approved	✓ Biosimilar of Stelara®, 28-week results of global phase 3 announced at EADV ▪ Demonstrated clinical equivalence and safety compared to the originator ▪ Commercialization of IL-12/23 inhibitors is well underway
	 Herzuma Trastuzumab	HERCEPTIN® Trastuzumab	Approved	Approved	
	 Vegzelma bevacizumab	AVASTIN® Bevacizumab	Approved	Approved	
Other Therapeutic Focus Areas	CT-P42 (AMD)	EYLEA® Aflibercept	In Phase 3		✓ Vegzelma® obtained approval in the US, EU, Korea and Japan ▪ Indicated for the same types of cancer(colorectal cancer, NSCLC) as Avastin® ▪ Expected to synergize with the existing oncology portfolio
	CT-P39 (asthma, CIU)	XOLAIR® Omalizumab	In Phase 3		
	CT-P41 (osteoporosis)	PROLIA® Denosumab	In Phase 3		

¹ IFX: infliximab

Key Takeaways from UEGW

United European Gastroenterology

Remsima SC

- Serum levels stayed stable after switching to Remsima SC from IV infliximab¹
- With real-world data on 181 patients demonstrating the efficacy, stability, and safety of Remsima SC, its uptake is expected to increase
- “99% of my patients switched to Remsima SC, as it offers improved convenience and efficacy”²

Yuflyma

The world's first high-dose & citrate-free biosimilar, reducing injection frequency and pain

The **only** biosimilar adalimumab that has the same strengths and presentations as the originator³
Less frequent initial dosing & varied presentations for patients (prefilled pen AND prefilled syringe)

“An unparalleled biosimilar that offers great patient satisfaction”⁴

**Solidifying Top-Tier position in IBD Therapeutics
with Remsima IV + SC and Yuflyma**

¹ Efficacy and safety of elective switching from intravenous to subcutaneous infliximab (CT-P13): a multi-centre cohort study,

² A Gastroenterologist of Clermont-Ferrand University Hospital, France, ³ High-dose 40mg/0.4mL PFS/Al & 80mg/0.8mL PFS/Al, ⁴ A Gastroenterologist of Grenoble Alpes University Hospital, France

Key Takeaways from EADV

European Academy of Dermatology and Venereology

Phase 3 trial results for CT-P43 at Week 28 demonstrated **equivalent efficacy and similar safety profile to Stelara®**

Study Design Scheme

Equivalent efficacy and safety between treatment groups

Efficacy

- Comparing the PASI¹ score improvement between groups at Week 12 shows that the **primary endpoint was met**
- Efficacy endpoints at Week 12 and Week 28 were all met, **demonstrating therapeutic equivalence**

Safety

- Well tolerated with a **safety profile comparable to that of the originator**
- No notable safety issues were identified following switching to CT-P43

Improvement in PASI score¹ through Week 28

¹ Higher PASI response indicates a higher % improvement from baseline on PASI (psoriasis area and severity index) score

Next Wave Pipeline

- Autoimmune
- Oncology
- Other Therapeutic Areas

※ The schedule may be subject to change

Global Capacity Expansion

**Global DS/DP manufacturing facility expansion,
to ensure supply chain flexibility to market demand**

Innovative Drug Development Update

R&D Focus Areas

Leveraging ADC platform technology following investment in Iksuda¹ to accelerate innovative drug development

- Entered a license agreement with Pinotbio for the use of linker-payload technology (Oct. 2022)
- Celltrion gained the rights to the ADC linker-payload platform for up to 15 targets to develop various ADCs for cancer treatment

Embarked on the co-development of next-generation T-cell engaging bispecific antibody

- Entered a partnership with US biotech Abpro to co-develop cancer treatment 'ABP102' (Sep. 2022)
- Indication: HER2-positive breast cancer
- Competitive edge:
 - ✓ Next-generation T-cell engaging bispecific antibody with minimized toxicity compared to the 1st generation
 - ✓ One of the Top 3 fastest developers of the next generation bispecific antibodies

¹ 28.6% ownership

**New drug development well underway
through equity investment, licensing deals, and co-development**

The background features a central sphere composed of a wireframe of triangles, with a blue-to-teal gradient. This sphere is surrounded by faint, translucent geometric shapes. In the corners, there are network-like structures of dots connected by lines, with dots colored in shades of blue and teal.

THANK YOU
